SUMMARY

Full-stack software developer with 3 years of experience specializing in Java, Python, AI/ML, Angular, React, React-Native, PostgreSQL, MySQL and Linux. Building AI-powered applications with the RAG, AI/ML, Harnesses(Codex, Opencode), Hermes Agent etc.

EXPERIENCE

- Full Stack Developer (Java, Angular)** - [Ishani Technology Private Limited](#), Hattiban, Lalitpur **Aug 2025 - Present**
- Full Stack Developer (Java, React)** - [HimalayanTechies](#), Babarmahal, Kathmandu **Jan 2024 - July 2025**
- Java Developer** - [Onviro Tech](#), Kamal Pokhari, Kathmandu **July 2023 - Dec 2023**

PUBLICATIONS & RESEARCH

[Objective Hearing Screening via Auditory-Evoked Pupillary Responses](#) | PyTorch, Deep Learning, OpenCV, Transformers **March 2026 - Present**

- **Under Review at IEEE Transactions on Biomedical Engineering (TBME)** [ID: **TBME-02438-2026**]; Archived DOI: [10.5281/zenodo.22526582](https://doi.org/10.5281/zenodo.22526582); Live Demo: raju-sah.github.io.
- Architected end-to-end framework decoding autonomic LC-NE pupillary dynamics across 3 multi-site cohorts (21,164 single-trial epochs). Proposed CNN-Transformer achieved SOTA **0.844 ROC-AUC** and **0.512 PR-AUC** (4.2× over chance) under strict 5-fold StratifiedGroupKFold cross-validation with zero subject leakage.
- Developed real-time least-squares ellipse fitting on 30 fps webcam video achieving **r = 0.991** concordance against EyeLink 1000 infrared eye-trackers; proved 1.5s latency truncation preserves ≈96% screening accuracy, reducing examination duration by 50%.

PROJECTS

[Uturn International Pvt.Ltd](#) (Direct Selling Company - Web & Mobile App)| SpringBoot(Java), Angular, React-Native, Spring Security **Sept 2025 - Present**

- Worked on a full-stack web application with the team for Uturn International Pvt. Ltd., a direct selling company. Implemented commission calculation, referral tree structure for distributor, distributor, sale centers, admin, various reports, and other core business features. Solely developed a mobile app development for distributors. Made the **RAG chatbot** using free **AI LLM** providers **Gemini, Groq, OpenRouter** with auto fallback option of the top models to another using routing strategies.

[Document Management System](#) | FastAPI (Python), AI/ML (OCR), SpringBoot(Java), Hibernate, Angular **Feb 2026 - Present**

- Designed and developed a Document Management System with OCR capabilities to convert Tamang and Newari language text from PDF, DOC, DOCX, images and plain text into Nepali language.

[Edufinity](#)(School Management Software) Java, PostgreSQL, REST APIs **Aug 2024 - Present**

- **LLM-powered features** like calling the gemini api free apis to onboard any school(student, routine, teachers etc) to our software using by uploading their excel data and for that we have used the excel header mapping to our system using AI LLM apis.Class routine, events, exam setup, bulk student and teacher uploads using Excel files, marksheet generation, Seamless billing feature integration with accounting software for each student. Push notification feature api for events for mobile app.

[Accounting Software](#) | Java, PostgreSQL **Aug 2024 - Present**

- student billing system, voucher creation, voucher payments, contra voucher, payroll employee setup, employee salary setup with allowances, deduction, contributions, salary approval, voucher generation, voucher payments, journal reports etc.

EDUCATION

[Cosmos College of Management & Technology\(Pokhara University\)](#) **Satdobato, Lalitpur**

Bachelor Degree in Computer Engineering - (**CGPA:-3.26/4**)

Aug 2018 - Oct 2023

SKILLS

- **Backend** - Java, Python, NodeJs, TypeScript, RAG, AI/ML, Redis, WebSocket, CI/CD, Docker, Nginx
- **Framework** - SpringBoot, FastAPI, NextJS
- **Database** - MySQL, PostgreSql, MongoDB, FireBase
- **Frontend** - ReactJs, Angular ,React-Native
- **AI/ML** - PyTorch, TensorFlow, Keras, OpenCV, CNN, Transformers, Scikit-learn
- **Tools** - Jira, Harnesses(Codex, Opencode etc), Hermes Agent, MCP, agent skills like caveman, ponytail and mattpocock's grill-me, to-spec, to-tickets, implement skills to have the better TDD development from the Skills.sh, and many more.
